

NI PUTU MARIANI MARSYA PUTRI

IT PROGRAMMER

ABOUT ME

I'm a Fresh graduate from SMK Negeri 1 Denpasar majoring in Software Engineering with strong interests in Web Development and Internet of Things (IoT). Experienced in developing several academic and personal projects, including responsive websites and web-based applications. During vocational school and internships, gained hands-on experience in website development, data management, teamwork, and project presentation. Passionate about learning new technologies, solving problems, and continuously improving technical and communication skills.

EDUCATION

SMP NEGERI 2 KUTA UTARA
Badung
(2020 -2023)

SMK NEGERI 1 DENPASAR
Denpasar
(2023-2026)

HARD SKILLS

- HTML
- CSS
- JavaScript
- Laravel
- MongoDB/MySQL
- IoT

SOFT SKILLS

- Communication
- Time management
- Teamwork
- Problem-solving

EXPERIENCE

○ **MicroPlayground**

With HTML, CSS, and JavaScript

- Developed an interactive web-based learning platform using HTML, CSS, JavaScript, and AI integration with Gemini API. The platform provides structured learning materials based on categories and includes an AI-powered assistant capable of delivering both local answers and AI-generated responses to support users during the learning process.

○ **Profile company**

With HTML, CSS, and JavaScript

- Designed and developed a company profile website using HTML, CSS, and JavaScript to present company information in a clear and structured manner.

○ **E-parking**

With Laravel, Bootstrap, and MySQL

- Developed a parking management system using Laravel, Bootstrap, and MySQL with automatic ticket generation, payment receipt printing, QR/barcode scanning, parking activity monitoring, and payment report management through an admin dashboard.

○ **Travel Agent**

With Laravel, JSON and MySQL

- Developed a multilingual travel service website using Laravel, JSON, and MySQL. Implemented dynamic language switching and integrated a database system for managing customer testimonials and travel-related content.

○ **Smart Trash Bin**

- Created an IoT-based automatic trash bin project using Arduino Uno, ultrasonic sensors, and servo motors that automatically opens when detecting nearby objects.
